Muse - Reapers

Album: Drones

Genre: Alternative Rock, Pop Rock, Hard Rock

Year: 2015

This album seems pretty hit or miss. Which is pretty much exactly what I expect of Muse nowadays...I liked the last album more than a lot of people, but uh...I barely care about it anymore. Got better shit to listen to.

Same deal with these. Some of the pop singles are cringe worthy. Though stuff like this is okay when I want something more simple and just some cheesy hard rock/alternative rock, I guess.

All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
