Nearly flawless folk metal album

Speaking of [Metal](#). You might like this band.

Edit: Note, I actually like this song as well, and I am very picky when it comes to metal bands. When I heard my dad listening to these guys, I actually dug I believe a couple of their songs, because it was different then your typical straightforward metal. The vocals interested me more, and the music.

i love that album

something from the Persona 4 OST probably

we, unlike the bourgeoisie, have nothing to lose and therefore our expression will be the only honest one, our words will be the only challenging ones and our art will be the one revolutionary expression. We need new noise and new voices and new canvases to become something more than the last poets of a useless

generation.

Amiina-Hilli

These guys showed up on Spotify, and I always wanted to listen to more of them (They do stuff with Sigur Ros regularly). Good mellow, cheery music.

Hey, that's Ajattara!

Ajattara is a black metal side project of the lead singer of Amorphis, one of my favorite bands. They've been on my to-listen list for awhile.

The song you posted was great. I loved the use of acoustic guitar. I'll definitely be checking them out more now.
