Title: F.I.F.O.

Artist: Brennan Heart

Genre: Hardstyle

*This is me, this is my music
I like it just a little harder sometimes
Now why don't we, go out and lose it
Freedom is free 'cause it's all in the mind*

*There's no room for hating in this life we love
It's either fit in
Or fuck off!*

*Towards a gate between life and oneness with darkness
on a path made of crushed joyless frozen flowers
I will never look behind me, the desolate dark awaits
only once reaching out to crush the memory of life
Wandering into the endless depths of the dying horizon
to disappear in the raging funeral snowfall
In obscurity, encircled by the coiling shapes in ice
with eyes staring into the silent infinity where eternity awaits...*

"Imitation" - Bridear

Are these "human rights" in the room with us right now?

☐ Professional pessimist. Reactionary socialist and gamer liberationist. Coffee addict. Fun at parties ☐

Freedom is when people agree with you, and the more people you can force to act like they agree the freer society is

You are the trolley problem's conductor. You could stop the train in time but you do not. Nobody knows you're part of the equation. You satisfy your bloodlust and get away with it every time

Manchester Orchestra - *Pensacola*

*And when I looked at Michael he heard "I need to be alone"
But when he turned his head I soon corrected "Need to be at home"
It took me all this time to get where I said I would never be
I hope it's not even out there
I hope eventually you'll see what you've been turning me into
It's all for you*

Time for a love song. ☐

Band Noa Noa - "Pobre de mis Ojos" (My Poor eyes) - Seems he cannot stop crying since she left. He still loves her and needs her by his side.

Band was from Argentina. Song has good lyrics.

I'm so sorry but 1184 is the best Windir album ever.

Zyklon-B - Mental Orgasm

Thanks for the heads up, because I was actually going to listen to that album later today. ☐

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
