I was making a joke, since this thread is more about posting the current song you're listening to, album, or band, not what you're listening to in general ☐

I know, but if you post so many artists, you don't need to post for the next 30 minutes

Well that's boring

I post a lot because I'm sitting at my computer listening to music and not doing much else of importance, all the time, so I might as well do something at the same time...

But I especially do that when I'm listening through new music that I've never heard before ,for whatever reason or other.

Both of those would be good

But I have been doing quite a lot of yard work lately, so that's something.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of

evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
