The Mizian view of democracy's role in society is best described as "bottom down"; that is, at a community level individual participation in government is important and even essential, but that at a higher level the monarch should retain a good deal of executive power. This has led to an interesting situation where they've devolved a significant portion of day-to-day management to citizens but retain their monarchy- similar, I find it interesting to point out, to a feudalistic hands-off approach.

ColBureau developed as a response to society's aversion to liberalism and right wing libertarianism, branded as culprits of the climate collapse, born from the mass consumerism and rampant egoism of an era. ColBureau was thus created as a system that would make sure the individuals would have barriers (and paperwork) separating their ill-advised ambitions from the disastrous consequences they could bring. However, in many cases, the bureaucracy spiraled out of control, acquiring life of it's own. The system no longer functioned for the People, not even for it's creators or the common good. Now it functioned because it couldn't stop. It mustn't stop.

conclusion of their wars would by all means be considered the sort of war crimes that end up with you hanging by the Hague. For example, the invasion phase of their war prosecution specifically involves harming civilian trade and attacking undefended planets, while the goal of most, if not all, wars they fight in is genocide.

BN, please pick a factbook from [here](#). I decided to compile them here because of how many there are going to be.

Despite being a nation which values its media presence, their main TV broadcaster only has three channels. In order, they are the WBS main channel, WBS second channel for entertainment, and WBS third channel for sports...which only started in 2012? I'm actually really surprised, given your offsite wiki says the population of Waisnor is over 2 million, and even small cities in real life have tens of channels.

"We might not always be the main character in the wonderful play known as Earth, but we can always be the protagonists of our own lives. And that, for me, is more than fulfilling."

Okay, so hypothetically, there's a girl in England.

The context around her in the stories included is that of a more steampunk-esque Great Britain - or at least one with more aesthetical class than the OTL Great Britain. This offers the stories more rich environments to be conducted in. Said stories seem to be following a slice-of-life style for the protagonist, Sophia.

So, Sophia in England. Oh, it's a narrative Factbook with a framing device, that's fun. I've tried that, though I'm realizing academic press book is a pretty dry framing device. A video game with saves, loads, and a menu screen seems a lot more fun.

1800s England seems about like what you'd expect. Trains for transport, school for nobles. But Sophia is very forward-thinking. She doesn't seem to have any prejudices against foreigners. If she was going to dislike Sakura, it was over flashiness not nationality. And if the images are to be taken at face value, she cuts some daring skirt lengths for the era.

Most of the story remains WIP so far, but story 3 hints at something funny that's also mentioned in the signature. The math genius- Vivian?- can't do arithmetic? Wonder what that means.

Okay, so. Sternenstaat. One thing I learned is that the Staat is diarchic and has managed to combine feudalist sensibilities with populist autocracy. Combining power from the people with power from the center, you don't often see that. The kaiser is "embodiment of the state" while the kanzler is "prime representative." So it seems like originally at least the kaiser held the real keys of power, but over time reforms have empowered the kanzler more and more, hence both a feudal king in the kaiser and a populist autocrat in the kanzler. I'm assuming the kanzler is somehow democratically elected? And that's why the position is called populist. But I can't see it actually said anywhere in the National Factbook that there are elections so I could've gotten it wrong.

In insisting it's a political simulation, NS ignores its reality as a political simulation *game*. Games have boundaries, and modern roleplaying games have safety tools. NS has neither, leaving it stuck as a badge-collecting pay-to-win where causticness is excused as "character," grieving/raiding is "just politics," and F7 is more courteous than General Assembly.

The Staatssternenbahn, an inter-connected transportation lane system with "maximum-security star highways" and their respective check-points that serve as the main basis for travelers and inter-stellar commercial trade convoys. The MS considers it not only their economic lifeblood but also as a heavily strategic means meant to project their military as their galaxy is teeming with life that isn't friendly or that they consider as a menace.

Liagolas wrote:

Yeah. Mee too.

Answer: the Dominion has this THX-1138 thing going on; their State follows a totalitarian ideology that's referred to as "hypernationalism"...which is devotion to the all-important state *with* the death of the individual at the hands of absolute complicity and uniformity, this also extends to the rather unceremonious group-based leadership as they regard the whole of the nation-State as the only real thing that matters.

What I learned was that the Saucer Pilots are pretty much alternate dimensions humans, who hail from a highly advanced alternate dimension. But where kicked out and thus went back in time/into another dimension. While they could have easily taken over this alternate Earth, are amused by their more primitive brethren and thus, like an older sibling likes to mess with them. I also learned that they look at things like 'down time' and 'relaxing' with childish interest, mostly because they are used to a rigid routine.

Well, primarily that AN is a semi-nationalistic and very militaristic FT nation that has developed FTL travel. With a long militaristic history, they have climbed their way to the stars as a unified and strong state, which is somewhat interesting. I'd say it's neat to see a martial FT nation that isn't just 'Nazis in space' or 'America in space'.

The Tall Ghesites, a creole population resulting from the race-mixing of Cape Colony's Ghesite population and its Khoisan population, were 'native', to a degree, to the Cape. Until they were virtually expelled from the Cape -and later the rest of the British Commonwealth- by the Apartheid government.

One of the factions fighting in their civil war is the Outlander. They have escaped persecution, wandered as nomads, are stereotyped as thieves, and a thorn on everybody's side. This makes me think that they are the Gypsies of Albania.

The National Republic of Argentina ~~~~ *Sindicatos*, neofascist rejuvenation, all-seeing securocracy, soul-crushing corporatism, Futurist death squads, 80s street fashion and music, avant-garde art, pristine beaches, and pure cocaine

A Dream Crushed (1986)

- Le Patron's dream of a Futurist society ended in 1976 when the Nuovo Ordine and the CIA launched a coup against the Patron. With the Futurist Right ascendant; Patagonia faced through a national reorganization to cleanse the stench of syndicalism.
- State-President [Galeazzo](#) saved Patagonia from anarchy, reunited La Plata under the Red Eagle and turned it into a sustainable capitalist, big tent authoritarian state with Futurist dressings. Now, Argentina enters the 80s where it's on its way of becoming a Great Power once more.

In spite of Argentina's history with federalism, and perhaps in large part *because* of it and how it led to the Surrealist takeover of Patagonia, the modern Argentinian state is strictly Unitary. It is made of 30 provinces and two autonomous cities -strangely, one of them the "capital" of the former Surrealist state. The country is also somewhat depopulated, having around 14 million less people than Argentina does in real life.

A little hidden fact I found out about Rìoghachd Talamh an Èisg, buried deep within the awfully confusing text is this:

In one of the paragraphs of the main factbook, it mentions this... As follows: They have a friendly forbinding with the Netherlandish and the Bretoners, both because of their input to the Befreeing of both lands during the Twithe Great Crig.

So as it seems, this confirms (???) that Britany survived until the modern day in this universe, which is a neat little factoid if true... Anyways, yeah.

BN, considering I am 'new' here, why don't you react to my [National Overview Factbook](#), ye?

Though the Wehrmacht makes heavy use of military personnel enhanced by magical powers and abilities and their mages are among the most notable people, the *Heer* itself still makes use of many regular flesh-and-blood ground troops, albeit these formations also now make use of new post-War gear that can only be summarized as being magi-tech.
