Suddenly, the planet's movement through space begins to decelerate. Man gets tossed randomly by this sharp jerk in the planet's movement and falls into the cavern with Erin's group.

Erin: Oh no, is that whatever influence Ashotu still has in this universe?

She then runs the calculations through a random computer nearby:

Day 1 of 573, 6:46

Distance from sun: 149,695,000 km

Average temperature: 15.9°C

Erin: So in 8-9 months anyone without protection will be dead. We'll make it to the final month down here; around day 556 the rock layers above us will weaken enough from the heat to collapse.

Auto-possibile, Entro i

In Italian it means

Anything is possible, within our limitations

Or at least i hope that's what it means since these days you can't trust google translate. For all I know I could be saying "Your mother was a hamster and your father smelt of elderberries!" PS: If you get that reference then you are very cultured.
