Their factbook is less of a factbook than it appears to be an extensive collection of odd first-person testimonials. While most of the missives seem to be attributed to this @-person, I find I have no conclusive idea as to who or what that name might apply. For all I know it is some form of psychometric amalgamation-- which, given the nature of the factbook itself does not strikes as outside the realm of possibility.

According to the culture factbook, Godulans have had somewhat of a problem with regards to neo-nazi subversives in the past. They consisted of large numbers with an established foundation, which led to fairly strict responses against them. These days, the nazi sympathizers are all but gone, but their former presence serves as an important reminder to the Godulans as to the importance of order.

This is pretty interesting, the exact details with regard to their disappearance is vague, but I can only assume based off the allusions described within that it involved something along the lines of a supercharged atomic bombardment times a million.

AN: Acharret places a great emphasis on its military, and strives to ensure that its enlisted members are well equipped with the best that technology has to offer. Conscription is utilised, but luckily for the military, troops are generally very motivated and proud, with faith serving an important role in keeping spirits high. In fact, each unit usually has at least one chaplain on duty to help service this demand.

Very inspiring!

... because they deserve a demotion promotion.

Basically Godular can just do whatever they want to with little to now regards for safety or cosmic vacuum decay. Fun.

AN: They are set in 1936 with MT, or something like that. And they basically are just sad, sad, American Southerners from what I can tell.

They have factbooks on a lot of weapons. Not just weapons mind you - but vehicles and bombs. They've even got their specifications all nicely laid out in a formatted table. How neat - I could barely be bothered to write specifications for my power armor page.

Endave, but successful. This time they're genuine fascists instead of weird pseudo-Nazis, and have managed to unite pretty much all of the eastern continental states - from the looks of it, they're gonna try to do the same to the western half. Also, Florida is gone, which I can only assume played a vital role in their success as a nation.

They're an extremely nihilistic country, or rather, a community, which believes in lack of structured society and civilisation, basically anarchism, and believes that man must go back to follow the methods prescribed by nature.

Despite being independent they're still under the British monarchy, and they didn't even start as a British colony as far as I can tell. I guess this is kinda like Canada, but the closest analogue would be Hawaii, and they aren't under the Crown anymore. Also the player's kinda lazy and just copied over their factbook from their other nation without scrubbing it first, so I know who you are. You can run but you can't hide.

#### What if Eastern Rome survived?

**Basic Overview:** Basically an althist where Basil II actually has decent successors who build on his achievements, resulting in a STRONK ERE that beats back the Sejuks and eventually does it's own reconquesta in the Middle East. Also, The Crusades never happened, the Viking conquest of Britain succeeded,

Genghis Khan died as a young prisoner in a tribal camp, Alexander Nevsky united Russia, and the HRE became a centralized state and destroyed France and the Normans.

In this somewhat primitive, anti state society, the modern conveniences that we take for granted have all but disintegrated, leaving a nomadic group of morally numbed free-thinkers, and Kotera is simply another one of them, writing to ensure their stories are kept alive. Spiritually speaking, he's transcendently philosophical in a near-sociopathic old-fashioned way, almost like the kind of character you'd see written into a Stanley Kubrick movie. The reminder of the indispensability of human nature even in a post-traditional world setting is fairly enlightening, and I enjoyed this read.

English is the lingua franca and the official language used in business, government, law and education within Convallaria. The Constitution of Convallaria and all government legislations are written in English, and interpreters are required if a language other than English is used in the Convallarian courts. Statutory corporations conduct their businesses in English, while any official documents written in a non-English language such as French, Spanish, or Yiddish are typically translated into English to be accepted for use.

The military genuinely has actual ranks.

For each branch.

And for some reason it goes from major general to lieutenant governor to general. Why it doesn't just go major general, lieutenant general, I can't explain.

In a sudden and tragic turn of events, the Emperor has been killed...by poisoning. People are going crazy. The military is locking down cities. A curfew has been set in place. So far, what we do know is that a certain 'Rufus Dedcion', an herbalist, was seen leaving the palace in a hurry just a few hours after the Emperor became ill. (Quite suspicious) And consequently, posters have been distributed around the town, and his house has been seized for investigation. What's more to come...I guess I'll just have to find out!

Oh man! This is a cool factbook concept that I haven't seen before...

Why are you so caught up with everything? Why can't you just, like, vibe for once? I don't care that this nation is corrupt. So what if all of the government is a facade for backsliding democracy, for plutocrats and corrupt bureaucrats? What does it matter to me? Just wanna grill while Mirrorlake and Achar-Tam squabble.

(Still haven't found out why the president talks that way, for the record.)

(And technically Paterson exaggerates his accent some, but everyone in the nation has that accent. It's meant to be an unholy lovechild of a rural Newfoundlander and someone with a deep-South drawl. I gets lowered into Ah and O gets raised into Eh, when those sounds dominate their syllables.)
