My previous favourite band Cradle of Filth has been replaced by Moonspell.

You might like this band called Moonsorrow. They're a really good Finnish folk-metalish band. [This is one of their better songs.](#)

They were okay, but I dislike folk influences.

Demonical - *Through Hellfire*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Five and a half hours without any posts while I'm gone.
