“ Alice Gardens wrote:

^How many songs does Spear of Destiny have? I think 1 song is quite sufficient for this thread. You don't need to post every single song.

It's a "What are you listening to right now?" thread, you can post whatever you are listening to. If it means going through an album and posting every song when it comes up, so be it. There's no problem with it. Hell, I posted every single song ever by Porcupine Tree over a week period, and that's over 10 albums. And I do that quite often when I'm checking out an EP or LP. As I'm going through it, I post the songs and typically a YouTube link, since I'm adding it to favorites on YouTube at the same time so it's efficient, and sometimes give little comments on the boringness or the awesomeness of the song. Unless

a mod says otherwise, I see no problem with it.

New Model Army - *The World (Live)*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
