Broken Hope - *Deadly Embrace*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I just learned more about this band today. They seem like they are the definition of a band who knows how to evolve well. Coming from black metal to electronic, trip hop, ambient music? I definitely need to listen to them.
