Monkey 368 was a blind investigator, and put the envelope with the storage disc in the evidence locker of the local police station. Suddenly, a hydrogen atom in his stomach fused with a carbon atom nearby, destroying the monkey via nuclear fusion.

monkey 367 noticed about how letters are becoming a good way to ensure one's death

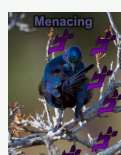

367 quickly delivered his own death letter to 366 with some funny looking secret documents, after that, 367 went out on his own terms and crashed face first through a pizza shop and landed on a couple's pizza

The death letter was put into a museum by a group of Brits wearing sunglasses. 364 was a child at said museum and died upon seeing the letter in the exhibit.

Liebindeland is on a small island off the western Portuguese coast. NS stats are canon unless anything stated elsewhere contradicts them. Thank you to -Astoria- for helping with the code I used on the daily news thingamajigger.

363 decided to try and stop the death letters from being produced by attempting to bring down paper production

he threw himself into one of the machines. this did not stop the production of paper and just created some pretty horrifying papers

354 found out about the chadian empire and lead the mr army to victory. He was elected president and changed the government to a centerist government. Him changing the government started the 2nd monkian civil war. Russia wanted to help the rebels but usa was having none of that, america's allies helped usa, russia's allies helped russia. His actions caused ww3. He committed suicide because of his deeds

Monkey 350 tried to detonate a sequence of nuclear bombs to reach the Earth's core for its rich minerals and inexhaustible energy. He underestimated how much heat and seismic activity would be released and destroyed himself along with the entire British Isles.
