“**Mayane wrote:**

Lorde - 400 Lux

Listening to it AGAIN, it's so easy to put on.

Like I've said before, it is one of those albums that is by far not the greatest album, but it is something easy to listen to when you just want something fairly simple to chill to. And sometimes that's all I want, instead of brain exploding avant-garde music with very odd beats, or crazy synthpop.

Kind of the same thing with Fever Ray's album, in a way, but it is an album like that I consider to be a great album in itself, as well.

Boards of Canada-Cold Earth

Hmm, I think I'm going to have to be in agreement with the people saying Tomorrow's Harvest by Boards of Canada is kind of...lackluster. It isn't bad, but I do think it is a bit weak compare to their other albums to be honest...

Scott Stapp - Proof of Life

Spotify is rather good for discovering new music.

Shostakovich - *Symphony No. 8 In C Minor Op. 65, Adagio*

“ **CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
