I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

### Fightstar - A Short History of the World

I love how it starts so melodic and theatrical at the beginning and then has a slow and heavy black metal-ish breakdown before reverting back to its original mellow sound.

## Washed Out - Feel It All Around

intended replacement nation for United State of America  
(original the character donut steel)

*Who is in control of those in control?*

Why does Ben Lee (who I assume is the linoleum faced 'wipe-clean-look' profile in the bottom right-hand corner) look like Rene Auberjonois? Why would Odo be hanging around a rubbish looking holo-world full of quidditch goals that vaguely resembles rejected Final Fantasy 13 concept art? And what happened in order for him to want to breath tornados? And how?!... It would take a vaster intellect than mine in order to answer those questions.
