They seem to exist in an alternate reality where the Flemish dominate Belgium and control a massive intercontinental empire.

Civil libertarian, economic populist.

OOC: Actually, our elections aren't party-based. Parties are more like a "party group" in the EU parliament than an actual political party. There's also really no reason to rig them, as all major political groups/orgs support Democratic Socialism (except the Communists and Byzconian Socialists, but they haven't broken any laws yet). There are a few pro-capitalist groups, but no one cares about them enough to repress them even if we wanted to. 🤔

Realizing that her death might mean instability even though parliament was there she created the council of ten. The council was made up of 5 Germans, 5 members of the Mittel Europa pact each from Poland, Latvia, Estonia, Belarus, and Ukraine. The last member was representative of all the Kaiserreich overseas territory. The council was to take her place in the event of her death until a successor could be placed on the throne.

I feel like they might need more than 1 representative to fairly represent all of their overseas territory

Their governmental system and their political party system seems very left wing centred although it was stated that conservative parties still exist in their nation. Pretty much all parties are socialist by name even if they're right wing. Interesting honestly.

(My factbooks aren't that elaborate and I wrote most of them two years ago when I wasn't the best writer and edited them recently so for now you'll have to deal with eh factbooks whoever is reading mine 🙄)

They originally were from some part of a presumably warmer place, exiled by the empire they tried to revolt against to the cold tundras that are now their home. Also, only women are allowed to be their monarch, and their process of choosing her is kinda complicated and essentially leaves them leaderless for an entire week.

Given almost *half* of the population is concentrated in the urban territories, you can often question *how* they eat (i.e. how does their agriculture function), but that question is often waved with "magic".
