"Amaterasu Omikami" - Hanormale

Odd one this. An album that's just one 41-minute "song". Basic guitars and drumming is fairly normal slow-to-mid-paced black metal. Then there's a lot of traditional eastern folky instrumentation over the top and some electronically-affected mostly-clean vocals. The guitars and drums go on fairly relentlessly in the background, quite low in the mix, but the extra instrumentation and vocals come and go in waves with some quiet bits and then more and more piling-in on top with a saxophone joining in on the busiest sections. Definitely some jazz influence going on.

Are these "human rights" in the room with us right now?

Napalm Death - *Opposites Repellent*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
