The Berzerker - *No More Reasons*

**CVT Temp wrote:**  
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

### Jesu-We All Faulter

Justin Broadwick brings some of the more interesting vocals to metal ever, with his weird tweaked vocals that sounds like something you'd imagine from an electronic band more than metal, and he has some of the most interesting sludge metal (mixed with various other things) ever.

Then you got him in Godflesh which is some of the most interesting industrial music ever, and his vocals are equally interesting and unique to metal.
