Ari learned through the good ol' "throw her into the deep end and see where she swims" technique. Her father gave little instruction to what he expected of her, which as one might imagine, makes for some very good daddy issues schema.

They're deeply philosophical, opposing the nihilistic approach and foster a deep love of humanity seemingly believing this will end the cycle of blood and violence humans have gone through for centuries for millennium.

The Arendellian Empire has four political parties active in its parliament, and three of them have fairly similar leanings. Indicative of an established dominant party system, possibly?

We can't really be sure of the validity of anything written in the factbooks because they've got propagandists editors tasked with verifying the correctness of those factbooks' contents and ensuring nothing bad about the government is documented all comments made therein are in good taste.

They jokingly refer to their own nation as "A nation of angry horse boys" but they actually have a realistic religion that seems like it could have been one the mongolians used. Also their nation itself seems to pretty much be mongialia with a spin. And the ooc character was pretty funny.

There's a reason for the first bit. There's definitely a bit of Tengri aesthetic thrown in there. However, the ultimate view of the religion's theology is much closer to a mix of deism and Mesopotamian religion, in that it believes in a mechanical cosmos, a duality of man, and the earth as inferior to the gods, as compared to Tengrism where the earth is the meeting-place of a higher and lower deity, Tengri and Eje respectively. That is, if I understand Tengrism's philosophy correctly. My underlying assumptions might be entirely incorrect.

The second bit, eh... they're much more similar to the Caucasus nomads and the Scythians, but there's definitely some Mongol inspiration as well.

"The Former Premier "Livi" was very clearly not the brightest of fellows. He had just recently brought down military reprisal on a collection of populist forums and instead of forming increased security around himself, he participated in a "party" full of his constituents.

Did he even consider for a moment that those constituents might realize he is too hot to support now that he has acted so clearly barbarically? Even I could tell that if whatever these secret societies are, that hold the federation together or something, someone else would have probably axed him."

so, they did that thing i've personally only ever seen in worldbuilding where they named their country directly after someone (rather than a title, for instance "virginia"), and they didn't even bother to check to see if she actually existed? interesting...

The modern CSA's first president was an ultra-chad named Abraham Packer who incorporated Alaska and Puerto Rico through the sheer force of his beard and cavalry uniform diplomacy, and who is essentially loved by everyone outside of the state of Mississippi, who most likely hate him for being black or something. Understandable, I suppose. His beard is still chad though.

The Russian military relies upon brute force to overwhelm its enemies, ground force that is, as apparently their ability to use Jets is comparatively limited compared to the other powers (Including the US.)
