With the exception of me and my annoying mind, I don't think I've ever typed so many F words in one day

Edit: Huh, I didn't realize until now that Fuck Buttons apparently has post-rock elements, obviously with VERY heavy electronic thrown on top of it. At least, Wikipedia says they are "Electronica and Post-Rock". I can kinda see it, now that I listen to it more, but they are definitely more electronic then post-rock if they are post-rock.

One of the best uses of that song was in Far Cry 3. Most of the time I think it is overused, and I personally think it is an overrated song, but I thought it was used awesomely in Far Cry 3.
