I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Meat Loaf - Bat Out of Hell

*Like a bat out of hell I'll be gone when the morning comes.
When the night is over, like a bat out of hell, I'll be gone, gone, gone.
Like a bat out of hell I'll be gone when the morning comes.
But when the day is done
And the sun goes down
And the moonlight's shining through.
Then like a sinner before the gates of Heaven
I'll come crawling on back to you*

Eyvind Kang - Binah

Okay...Now it became one of THOSE days...As much as I love all types of music, mellow stuff like this still brings me to another place that I tend to enjoy the most. WHICH IS NOT A VERY HAPPY PLACE but whatever. It's not really sad, though, either. Just...Kinda stuck in the middle, thinking...

Okay, now I just sound weird.
