Human Corrosion - *16 Million Voices*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Animal Crossing-K.K. Steppe

I could go for a whole soundtrack full of K. K. stuff. Both versions. The versions that play when you go get a hook from him, AND the ones that play on the radio at home. There's some pretty damn good songs.

Animal Crossing-K.K. Western

Every Sunday (Saturday?), this was like my families favorite activity, which was to go to K.K and attempt to ask for some song. We would do it on each of our characters. And I mean my entire family. We all played that game. The only problem is I wasn't very knowledged in music back then, so coming up with random genres to ask for....Or some that weren't even genres...yeaaaaahhh

The Sugarcubes-Birthday

This might be the only song I really like by this band. Briefly listening to some of their other stuff, I'm not crazy about it. Or the male vocalist....

Okay...It's 5 AM...Time to seriously go to bed.
