Mastodon-Naked Burn

Hmm, not hugely digging this album, either . Don't dislike it by any means, but I'm not loving it, either. Thought I would like their older stuff more than I apparently do.

Crack the Skye might remain my favorite by them.

My Last.FM and RYM

Look on the bright side, one day you'll be dead~Street Sects

Pink Floyd - Stay

One song more and then off to sleep. In the morning I'll continue chopping into my backlog, only 5 albums left.

Nirvana - *Blandest (Studio Demo)*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Crack the Skye might remain my favorite by them.

Clippng - Bout That

You might like Blood Mountain. It's the bands transition from Sledge to Progressive and has this weird mystical vibe to it.

I've listened to it before, I'm just going through albums and re-listening to them to remind myself what I thought of them, and rating them. Trying to keep track of the albums I want to purchase, and what ones I like alright or the ones I want to clear out altogether that I went through. I listened to way too much music and now it's kinda pointless to just hold onto things I didn't really care about in Spotify playlists.
