My storefronts

In other words, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Arsonists Get All the Girls - Shat Shart Tart

I grew to generally dislike death metal and deathcore and started loving black metal over the past two years, but goddamn if "old school" deathcore isn't good.

The Beatles - In My Life

Depressing Nordic semi-socialist commonwealth filled with Lovecraftian horrors, man-eating fox people, Finns, bizarre accents, Saabs, and Volvos.

A collection of some of my NationStates artwork. On the Commonwealth National Security Bureau.
