Rot In Hell - *Life Becomes A Desert Around You*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

My favorite song by them is Veljet. Murhat is also the only Ajattara album I've listened to because it's the only one in the library and I haven't downloaded any of their albums.

My dad, uh \*cough\* illegally downloaded their discography \*cough\* before we got Spotify, so I have every single one of their albums on my PC.

And that is one of the only albums of theirs I actually kept the entire thing on my playlist after listening to it. Some of their older stuff just didn't do enough for me I guess. Wasn't bad, just not something I could get into enough. Going through their albums was easy though, because they're short ☐
