Venetian Snares - *My So-Called Life*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Battles - Atlas

Great Math Rock album.

As much as I go through other math rock bands, that one still stands out as probably my favorite math rock album ever. I want to own that album.

Loved that album many, many years ago, and listened to it on a regular basis.

For some reason, even though I like quite a bit of math rock, I can never like them to the level of really wanting to own them: Except

that one.

Gorillaz-Latin Simone (Que Pasa Contigo)
