Hey, that song is in my music collection! It can be found on the 1991 EP "Forgotten Sunrise". Also:

Decrepit Birth - *Metatron*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has

already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I remember when I heard that there was the highest views in a YouTube video ever, at 250,000,000 for Baby by Justin Bieber...

Now Miley Cyrus' new song almost has that already.

Apparently that many views is nothing anymore.

For the shitty pop singles, that is.
