CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Destruction - Life Without Sense

*If I'd be you, I might to commit suicide
But you're strong enough to live on
Because it's you and not me*

*People turn their heads
Whenever you walk by
Because they believe
You live a life without sense
Life without sense
Life without sense*
