At The Gates - *Raped By The Light Of Christ*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

The objectively wrong opinions, stupidity, and/or degeneracy expressed in the previous posts of this special person trying too hard to fit into this place are no longer (if ever) held in the slightest and would be better off burned in righteous flames and doused in holy water, along with this website as a whole.
