Pantera's really more groove metal than anything. I wouldn't consider Pantera thrash.

LS-TTL - *Ameshc*

Minimal industrial ambient. From the album (**el.es.tee.tee.el**), released in 2001 by Dragon Flight Recordings.

“ CVT Temp **wrote**:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

When/if you do, Corrian, start with 2112 and listen to the next four albums. Everything they touched in that 1976-1981 window was pure gold. Hemispheres is my personal favorite.

Rush - The Trees
