Shostakovich - *Symphony No. 9 In E Flat Major Op. 70, Allegro*

“ CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Arma 3 is quite beautiful compared to every other war game ever made I would even go as far as saying that it tops Battlefeild due to the realism. Especially the Dayz mod is amazing with the textures. If you would like to see videos I suggest Eirebornfenix, Devildoggamer, or Jester 418? on youtube.

Suicide Silence- You only live once

I want it specifically because of the more realistic shooter mechanics. I don't know about graphics but it definitely isn't that terribly hard to beat Battlefield in realistic shooter mechanics.

But I won't have a good PC in a while, so...

Instead, my current one will continue to get shittier.

Sigur Ros-Kveikur

Apparently v's in Icelandic sound like w's.

Which is probably why Jonsi's cover of "Time To Pretend" has "We choke on our womit" instead of vomit.

Beck-Blue Moon

This, apparently one of two albums he has in the works at the moment, is supposed to be a spiritual successor to Sea Change. I could go for that...

Also really looking forward to his other album, too. The singles for it so far are awesome. He came out with singles for it before the album that appears to be coming out first.
