If I'm reading this right, their version of World War 2 was fought between a Russia/France alliance and Danelaw/German/Netherlands alliance, with Japan acting as an unaffiliated third party kicking around in the Pacific Theater.

After taking over Earth, the Caleshans were visited by humans from another dimension, who needed their help to defeat a interuniversal empire. Because the Caleshans learned how to travel between universes, they didn't need to focus as much on developing space travel aside from satellites and space stations.

Hatsunia expanded into the Micronesia isles at the end of the 19th Century peacefully and orderly, purchasing them from Spain either before their disastrous war with the USA (1898). They are divided into 7 provinces bestowed with a fair degree of autonomy and their inhabitants were given full citizenship.

AN In their timeline the Roman Empire survived and remained powerful all the way up the Mongol Invasions. As the result the Mongols invaded Scandinavia and eventually teamed up the Vikings against the Romans. The Vikings also discovered and unlike IRL actually established permanent contact. An analog to the Renaissance occurred centuries earlier and as result seems to have speed up technological development drastically.

What if Eastern Rome survived?

Basic Overview: Basically an althist where Basil II actually has decent successors who build on his achievements, resulting in a STRONK ERE that beats back the Sejuks and eventually does it's own reconquesta in the Middle East. Also, The Crusades never happened, the Viking conquest of Britain succeeded, Genghis Khan died as a young prisoner in a tribal camp, Alexander Nevsky united Russia, and the HRE became a centralized state and destroyed France and the Normans.

As is expected of a PT nation, their armies' troops that are armed with ranged weapons' main goal is to whittle down at the enemy instead of doing the main job of assault or defense, which is expected of sword-wielding foot-soldiers whom are often backed by more-elite specialists.

Throughout the Tohorin history, there has been frequent contact with alternate universes, one of which brought forth a world-spanning Orcish empire that attempted to conquer Earth. The fortunate coincidence was that the Orcish folks attacked when the various militaries of the world were in a massive arms race and on high alert.

The Mobile Tribes focus on moving around Caleshan territory in pursuit of their dedicated objectives, traveling from location to location seeking out new resources with which to expand their influence.

Given that each tribe in the Caleshan Valkyrie is stated to consist of hundreds of millions of people, I'd be fascinated to know how exactly this is accomplished. Are the members of a mobile tribe scattered throughout the Caleshan territory at large, like the Roma in Europe, with each of them moving about the country as they wish? This strikes me as the more realistic scenario, but it would seem impossible for such distantly scattered tribes to have Calas, or any other sort of hierarchy or leadership. Alternatively, do the members of a mobile tribe live together in a large but temporary settlement, à la Black Rock City, Nevada, until they decide it's time to leave? If so, it would be fascinating to know how hundreds of millions of people are conveyed from one location to another - some sort of massive, industrialized, technologically optimized operation under the control of the Cala? I'd love to learn more.

After centuries of turmoil, the Society for an Antarctic Constitution was started in 2761 by Rupi Chen, who used to live on the street, along with Vinson Mahindran and Harriet Tabarot, a former smuggler and mercenary. By 2763 the society had expanded to 24 members. Tragically, supremacist terrorist groups killed Rupi and a few other members. She would become a martyr and by 2779, half of Antarctica were members. Mahindran was killed by another terrorist, but this only made their resolve stronger. By 2786, the continent was relatively peaceful again, and the new Antarctic government was about to form.

Unlike in real life where Japan remained under the Shogunate -with the Emperor only being a nominal head of state with little power on how things went- Hatsunia shrugged off the Shogun's rule in the 16th century -probably through first contact with Portugal- and began a policy of non-interference (Rather than isolation) which would go on until what is in real life the Meiji Era.
