Their name is derived from the words "Au", meaning many, and "Lola", meaning island, which come from the language of the Tegatan people who make up approximately 90% of the islands' inhabitants.

Historically, the people usually referred to the islands as "Tegataka", but by other East Asian people they are generally referred to as "Takushima".

A race of slimes that were nearly pushed to extinction got hit by some fun alien stuff that made them into metal.

It's a unique start and I have to say it looks promising.

Erebus Space Command

Erebus Space Command is the result of 300 years of interstellar expansion in a new galaxy with no contact with the Milky Way. In 2539 Erebus Space Command encountered an alliance of aliens in this galaxy poised to destroy them. Although a truce was signed very recently, Lady Protector Ellenya has pledged to prepare humanity for the renewed war.

They are led by Ellenya (b.2521) who gained recognition for her nearly flawless track record thanks to "psionic" meditation - a very rare trait among such practitioners. She also rose to power in the midst of a crisis in which a majority of the government was killed, after which she declared marshal law and was named the "Lady Protector" by what remained of the government.

They have an amazingly well written constitution, which includes a ban on free travel, with certain exclusions, the punishment for such... And a ban on gambling. Because it's counter revolutionary. Win some, you lose some.

Apparently, a group of humans in cryogenic sleep arrived to the galaxy known as Oculus as a result of some sort of "slipspace" accident (Though I guess it could've been a wormhole). This accident also gave the original colonists powerful psionic abilities.
