I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Impaled Nazarene - The Oath of the Goat

*I am branded, I have power
I have vision of the new world order
The time is to come, to gather the beasts
To rewrite history, to head for the final apocalypse war
To make the swines pay, pay with their pathetic lives
To create an elitist world, for we have given the power
WE HAVE THE POWER!!!!*
