Rotting Christ - *Sorrowfull Farewell*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

My favourite genres shuffle around as often as my personality does. I was in a severe black metal phase for weeks, and now I'm gravitating towards trying out deathcore and metalcore, which I'm aware isn't metal, but oh well, that doesn't bother me at all. The only country song I know of which I like is Taylor Swift's You Belong With Me.
