Enter My Silence - *Six.Nothing*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

### [Wood of Ypres-Shards Of Love](#)

Time to go through this 16-song album.

Edit:  didn't expect the black metal vocals near the end with how the start of the song was like.

That album remains on my list. You've got me curious with those black metal vocals being mentioned, so next song will be that one.

The song starts kind of slow, though.

The one I'm currently listening to seems to have more of the black metal vocals (At least I think it is black metal? Not exactly a genre I know well)
