I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

This band is very...interesting. With these separate EP's by different band members, you got one that is more ambient electronic, one that is hard rock with 2 short electronic songs, and one about mid-ranged and they all sound unique. Good way to see what each band member does.

Eventually I'll actually get to the ones where they work together.
