I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Aphex Twin-s950tx16wasr10 (earth portal mix)

One more song to go through and the albums done.

Yes, that's pretty much what I feel about the album, is hoping for it to end. It's just not that exciting. Not bad, but not exciting.
