everyone knows that quote, "I know not what weapons World War Three will be fought, but World War Four will be fought with sticks and stones," but in a way it's optimistic and inspiring because it suggests that even after destroying civilization and returning to the stone age we'll still be sufficiently globalized and bellicose to have another world war right then and there

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Yup. It looked too interesting I decided I couldn't pass it up.

Actually, my dad bought it, because he "owed" me birthday money and he was in debt with me

Originally Beyond: Two Souls was going to be my last game of this console generation....but eh, I looked too much into GTA 5 and GTA 5 Online that I couldn't pass it up.

I'm not even listening to anything right now.

So how's FlyLo FM?

I'm waiting for GTA 5 on PC.
