Welllll, technically you're commenting on all of us posting our music right now.

Erm, no. I'm not commenting on your music, I'm commenting on your posting behavior and the meaninglessness of this thread.

I like to look at this thread and actually check out what other people post. I'll also often see a song that I haven't listened to in a bit and download it. Either way, it's still interesting to see just how broad the horizons of other people are. If you don't like the thread, you don't have to post in it.

Ora by Ludovico Einaudi.

Days like dominoes, all in a line

Emerge transformed in a million years, from days like these

Gehenna - 83%

“ CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's

basically impossible to prevent it from happening.

Have to Explode by The Mountain Goats.

The stage is set
Someone's going to do something someone else will regret
I speak in smoke signals and you answer in code
The fuse will have to run out sometime
Something here will eventually have to explode
Have to explode
