I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I was too into Victoria II to keep posting. I was doing so well with Italy but I didn't look carefully enough into the new HoD changes, so that completely ruined my plans for African colonization. :/ I'll start another game with the Ottoman Empire gone communist, because communism is good for warmongering totalitarianism. I prefer fascism but there's not much a warlord can do except be a bolshevik

until fascism arrives.

I need to get more Grand Strategy and RTS games...And I need Paradox games because I hear a lot of good things about them.

I also need a better PC to play said games.

I strongly advise you to look into Age of Wonders: Shadow Magic, and the FFH2 mod for Civ IV. And Victoria II with both expansions and the PoD mod because the 1800s is a nice time period for war. ☐

Peace through power.

I keep hearing good things about Crusader Kings and Hearts of Iron, too.

Yeah, I really do need to get into the Grand Strategy and RTS realm more. I own only a few RTS games. One being Company of Heroes which I've highly enjoyed, more so then I first anticipated from watching a video for it. Though after looking into it even more I thought it looked awesome. Too bad it is kind of laggy on my computer.

I haven't tried Hearts of Iron III since around release. It was horribly unplayable but I'm sure it's fixed now as most Paradox games are after two expansions and a mod. Crusader Kings II was lacking for me at release, but I'm planning on attempting it again with the Game of Thrones mod.

Paradox is one of a kind when it comes to grand strategy.

What I really want is an Elder Scrolls mod.

Your music is awfully light today. :/

This Pink Floyd album appears to be very mellow.

But yeah, everything else I was listening to was mellow, too....Not entirely intentional. I was just trying to finish going through both Lymbyc Systym and The Album Leaf. The Album Leaf I have one album to go and Lymbyc Systym I want to check out the Remix album and I'm done with that.

Just checked, and yes, it is from a new album that isn't even out yet.
