Wikipedia (ⁱ/ˌwɪkɪˈpiːdiə/ (audio speaker iconlisten) wik-ih-PEE-dee-ə or ⁱ/ˌwɪki/ (audio speaker iconlisten) wik-ee-) is a free content, multilingual online encyclopedia written and maintained by a community of volunteers through a model of open collaboration, using a wiki-based editing system. Individual contributors, also called editors, are known as Wikipedians. Wikipedia is the largest and most-read reference work in history.[3] It is consistently one of the 15 most popular websites ranked by Alexa; as of 2021, Wikipedia was ranked the 13th most popular site.[3][4] It is hosted by the Wikimedia Foundation, an American non-profit organization funded mainly through donations.[5]

On January 15, 2001, Jimmy Wales[6] and Larry Sanger launched Wikipedia; Sanger coined its name as a portmanteau of "wiki" and "encyclopedia." [7][8] Wales was influenced by the "spontaneous order" ideas associated with Friedrich Hayek and the Austrian School of economics, after being exposed to these ideas by Austrian economist and Mises Institute Senior Fellow Mark Thornton.[9] Initially available only in English, versions in other languages were quickly developed. Its combined editions comprise more than 58 million articles, attracting around 2 billion unique device visits per month and more than 17 million edits per month (1.9 edits per second) as of November 2020. [10][11] In 2006, Time magazine stated that the policy of allowing anyone to edit had made Wikipedia the "biggest (and perhaps best) encyclopedia in the world." [12]

Wikipedia has received praise for its enablement of the democratization of knowledge, extent of coverage, unique structure, culture, and reduced amount of commercial bias, but criticism for exhibiting systemic bias, particularly gender bias against women and alleged ideological bias. [13][14] Its reliability was frequently criticized in the 2000s but has improved over time; it has been generally praised in the late 2010s and early 2020s. [3][13][15] Its coverage of controversial topics such as American politics and major events such as the COVID-19 pandemic has received substantial media attention. It has been censored by world governments, ranging from specific pages to the entire site. Nevertheless, it has become an element of popular culture, with references in books, films, and academic studies. In April 2018, Facebook and YouTube announced that they would help users detect fake news by suggesting fact-checking links to related Wikipedia articles. [16][17]

A **chain** is a serial assembly of connected pieces, called links, typically made of metal, with an overall character similar to that of a rope in that it is flexible and curved in compression but linear, rigid, and load-bearing in tension. A chain may consist of two or more links. Chains can be classified by their design, which can be dictated by their use
