The Burritos and Catalonia continue their war against United Europe, utilizing the resources of their respective control over France, Italy, and the territories of the Greater Dos Empire to win a decisive battle in the Battle of the North Atlantic successfully capturing Svalbard and the Faroe Islands.

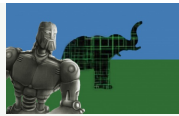

Europe continues to fight however even after a major naval battle. The Burrito Republic deploys ICBMs equipped with conventional warheads and begins a massive bombing campaign and infiltration campaign against European logistical and military facilities. In the chaos that followed in Europe, huge amounts of European infrastructure were destroyed as the mass attacks by the Burritos managed to weave through their extensive line of C-RAM, Anti-missile, and AAA defenses.

Catalan civls cheered in victory as European forces were now routed and focusing on a total war defensive effort. Catalonia had returned back to Europe. This time with a vengeance against those who had wronged them. The Burritos continued to support the Catalans with everything they had. The war continued.

The general of the Boblandian army gets told a really funny joke and dies of laughing. Meanwhile, Jeff Bezos is assassinated by a squirrel, marking the beginning of the Squirrel-Gerbil Confederation, which has all the lands of the Gerbil Empire and is starting peace talks between their ally Bobland and Basquenland and Labrador.

Stanistan changes it's name to Kekistan and creates a DMZ with the Doge Republic further to the east (where Mongolia should be).

Thanks to the efforts of the Capuchin Polity and allied nations such as the Emus and Dodoland, the worst of the nuclear winter has been avoided.

In the meantime, the capuchin sends an offer of friendship to the Squirrel-Gerbil confederacy. He wears his best suit to meet with their leaders, and is eager to forge a rapport between the two nations.
