The Blacklight virus, created by Emperor Alexander Mercer, is a virus that turns its host's body into an extremely durable and malleable blob of biomatter. While the host typically takes on the outward appearance of a tall, muscular, and attractive human, they can shapeshift at will and their internal organs are mostly just soup. Blacklight hosts are known as Evolved, and it was their creation that led to the existence of the Cybusian Empire. They replenish themselves either by eating normal food, or by liquefying and digesting a live target using piercing tendrils and acid in a process known as Consumption.

They are blessed by the almighty VOID.

The Osean and Belkan Alliance.

"Osea, Belka, now united as one."

A world where Belka fell into a civil war after the Belkan War, Osea and Belka unite as one nation and one alliance, and no they aren't scheming, they watch in silence as Erusean radicals are gunned down.

Memeism started off in 1500BC, once the primary Nordic Tribe arrived. They found an area tribe and asked regarding the faith, that was metusisim. The Vikings did not understood that attempted to iterate it, and it became, Maamism.

The exploration of outer-space and colonization of other worlds was partly a private venture, the Hahne Astrokörp being redundantly a powerful megacorporation in the lives of colonists. Violent disputes over the quality of life and civil liberties forced the corporation to seek a public-private venture with a formal government though.

The Suzuland-Pacifica Crisis (28-29 June 2019) was originally a conflict between Suzuland and other nations of Pacifica. The original conflict was mostly a source of conflicting ideologies; Suzuland's repetitive statements on Pacifica's RMB, concerning the fact that Suzuland was a dictatorship (Pacifica supported democracy and did not approve of dictatorships), caused a conflict between several nations of Pacifica and Suzuland.

Impireacht Na Eireann (Anno Domini 1622)

*The Irish Empire is a small empire and minor power in Western Europe. After unifying in 1101 under the leadership of the O'Brien Dynasty, Ireland has suffered for years but is now seeing a new light as a colonial and trading power*

- The Irish Empire, ordinarily remarked as Eire, is new to the world but slowly growing. Their government is somewhat elective, as their system of state is predicated on the Tanistry whilst also the social organisation Monarchies of Europe.
- Their national animal is that of the long-extinct Irish deer.
- Their economy is taken into account by the academe to be mediocre, although slowly inflating.
- Their economy primarily depends on subsistent farming, very similar to the economic methods procured by a large remainder of their mainland European neighbors.
- Their colonial ventures in geographic area have brought in new trades such as lumber and fishing.
