Yoko Shimomura-Kairi I

I think I KINDA had a "crush" on Kairi in this game. At least I felt really protective of her for some reason after she disappeared. Explains how I feel a lot of the time with movie characters and video game characters now...and my own damn RP characters...

Dead Can Dance - *Song Of The Nile*

CVT Temp [wrote:](#)

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I usually don't like this kind of pop music stuff, but for some reason I still like this song...Eh, maybe it's just the memories.

First comedy album I listened to!

Blasting off into the stratosphere!  
Flying high where nobody goes!  
Like a mean machine!  
He's a (Something I can't understand by ear)  
Like a bird of prey!  
On the (Something else I can't understand)

Yes starfighter!  
They call him starfighter  
Because nobody knows his name!
