1000 years in the future, all the ice has melted in Antarctica, and 66 million people live there. After going through centuries of turmoil, they have emerged as a friendly parliamentary democratic state dedicated to human rights and well-being. The main religion is a reformed version of Hinduism.

There is currently a food shortage affecting hundreds of billions of Vicilians in the empire. The Imperial government has handed out rations and some supplies, but other than that has done really nothing. Along with that they still make workers affected by shortage continue in their work even do, they most likely can't. This situation, in my opinion, may end French Revolution style.

Note: Many factbooks are in a constant state of WIP or being considered for entire rework or deletion

Welcome to The Alpes a Septentrionali Imperium, a nation where I brutalize and adapt Latin and French History to my needs to get my Ultraroyalist Absolutist French Monarchy with a vaguely French-sounding fictional royal family to work.

The Socialist Workers Commune, led by Jaroslav Jaroslava Dombrowski, is the only socialist faction in the country and is, coincidentally, illegal. Their main goals are to see the end of the monarchy and an creation of an Alpes socialist state built into a more egalitarian and worker-based society.

In contrast, the other 'anti-monarchy' party, the Jacobins, seeks to build a Federal Republic instead.

**Kabzeel**, meaning "God's Gathering" in hebrew, is a *federal, dominant-party, socialist(non-marxist)constitutional monarchy* with a rich Jewish heritage dating back to it's creation in 845 CE. Today, it spans almost the entirety of Eastern Europe and is the largest predominately Jewish and female-led state in the world as it follows the doctrine of "*Royal Socialism*", a paternalistic conservative ideology with an emphasis on socialization, social ownership, and conservative feminism. Its relationship with Israel is noticeably rocky, but this is due to the ongoing complications between Kabzeelian and Israeli Zionism.

The Petroleum Wars was a global-scale war waged over the major powers (China, the US, India, Europe and Russia) over who could control the ever-so-dwindling amount of resources Earth had left. Eventually, someone, from somewhere, launched a nuclear weapon. In retaliation, the major powers nuked the other major powers, which kicked Humanity into what is known as the Dark Century.

Simple: federalism. Beafrika is autonomous from Damascus much like how Indiana is autonomous from D.C.
