□□□ - □□□□□□

Apparently this was a big hit among young Koreans during the late 1980s. The first time I heard this song was when Yoo Jae-suk sang it in an episode of Running Man, because apparently he had been obsessed with the song when he was younger.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

"Avatarium" - Avatarium

I reckon this album just about shades the new one, but they're both plenty good enough.
