Sun Kil Moon-Tonight the Sky

10 minute song. Pretty cool. Digging this alternate rock/alternative folk stuff. Though to be honest it seems to be called indie rock/indie folk, too....There's a reason why I just ended up starting to consider them to be one and the same because a lot of bands I know are both indie and alternative.

All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
