Possessed - *Restless Dead*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I'm having one of those "I don't really know what the frak I want to go through" moments, so I'm just apparently adding more bands to go through. Smooth plan.

Interesting singing voice, but I don't know if I like it musically enough to care to listen to them more thoroughly.

I think I like Aereogramme, but I actually don't remember.

I've had them in my library for quite some time though.

I think I'll give them a try. I'm really quite enjoying his singing, and it is musically interesting enough for me. Probably won't be a favorite or anything.
