"Costco labelled as "greatest human invention of the 20th century"

How did something like this happen!?

La Ferra Suprema Reigns Supreme over the vast lands of Stella Nera  
A land where humanity is king, above god and devil alike. A blissful Utopia for Humanity, a horrible Dystopia for sentient robots.

Robots shouldn't have rights or citizenship;  
Compromise on other non-human sapient entities is possible, with limitations, but not on these buckets of bolts. They should serve humanity and have absolutely no place in society other than as our servants. Think of the benefits of this. Plus, they would almost certainly overtake humanity if we gave them the chance, whether out of pure advanced abilities or malice, or worse, both. Think of humanity.

The colors on the flag are meant to be Iranian not Mexican nor Italian

a bold salmon pink with a slightly blue-tinted dark green would look nice

They'll still overtake thanks to their superior abilities as machines are naturally more able and intelligent than humans. Hence why they must be repressed lest humanity fade into memory and history.
