Lamb of God - [Ruin \(live\)](#)

Without a doubt the most intense vocals I've heard. Not the highest screams or the most "brootal" growls, but raw power.

I have so many metal bands to go through (and probably adding more), so I think I'm going to go on a metal spree for a while.

Second of the two excellent ones on Ultra Beatdown. One more song and then it's Dream Theater marathon.

**CVT Temp wrote:**  
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
