Therion - *Baal Reginson*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

There will be war, there will be rebellion,
It's only part of the world we live in,
But we shall always fight for our rights,
and we shall always hold up our chins!
So we will fight for peace,
and all war, we shall cease!
Xironia!
